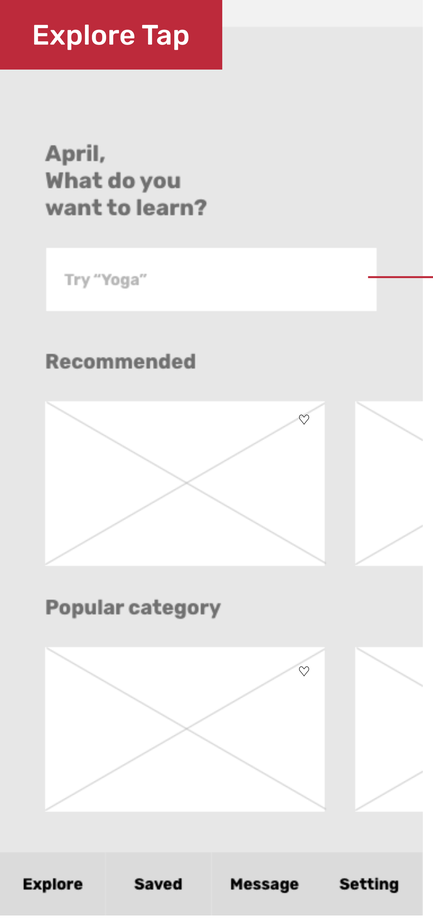
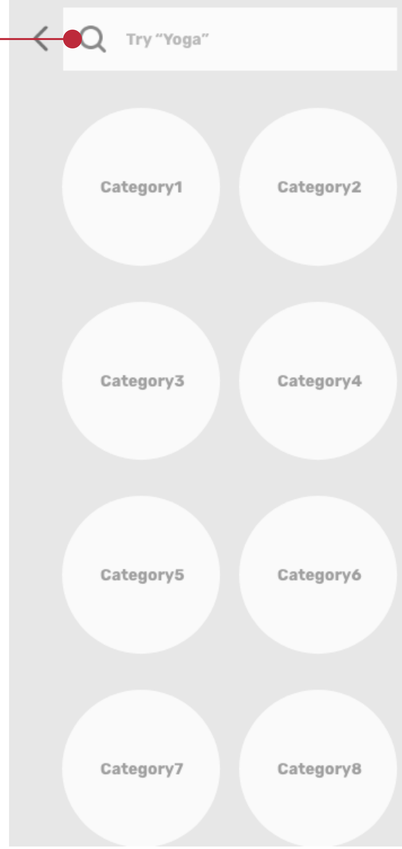
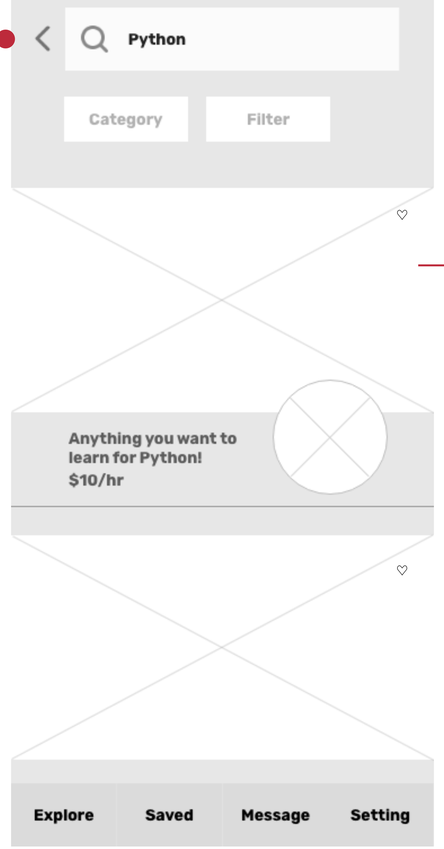
Explore Tap



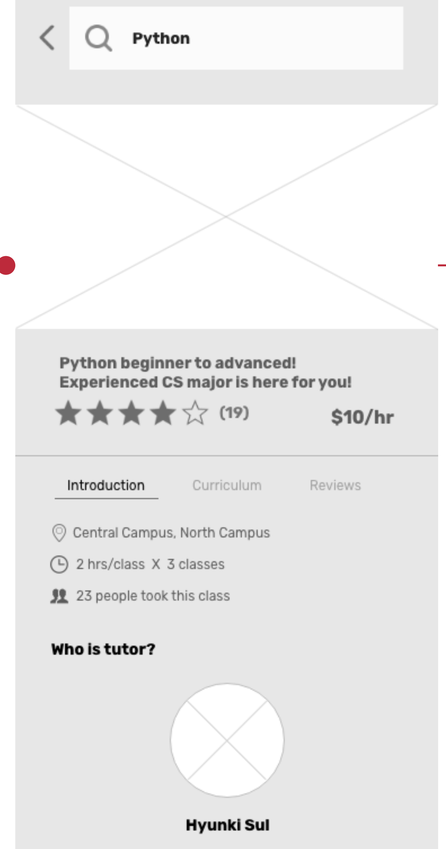
Explore tap allows users to either direct search for subjects or browse recommended, popular classes.



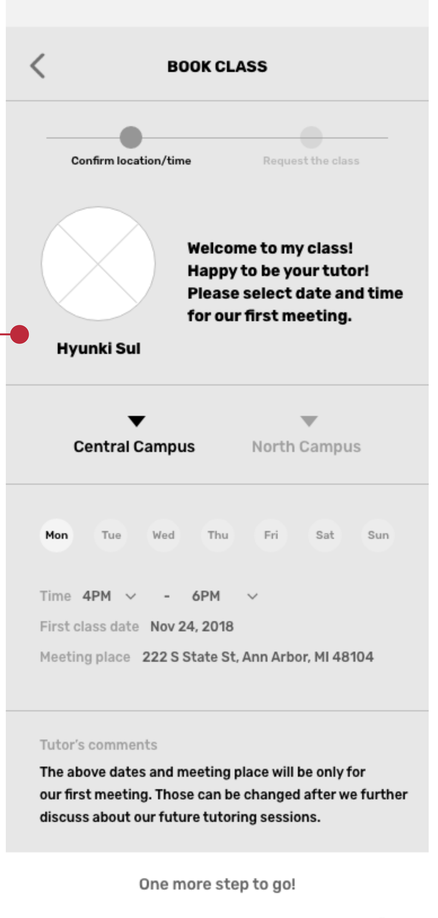
Once the users tap search bar, categories will show up so users can either tap relevant category or directly search by keywords.



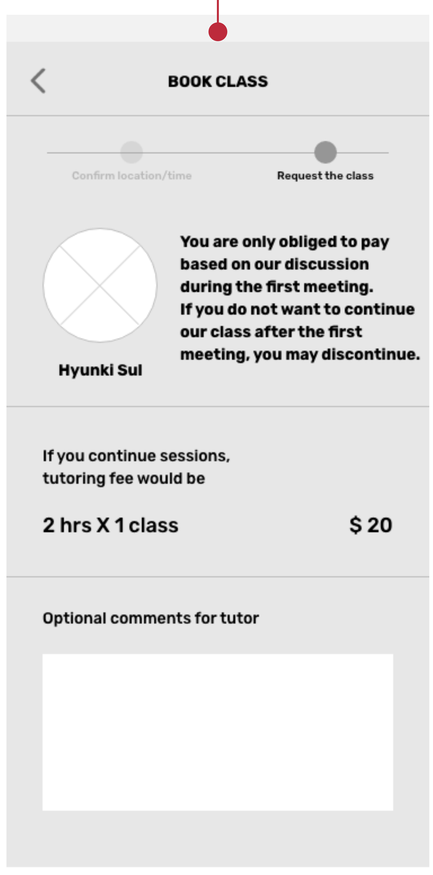
Once the user starts searching, relevant search results will be shown and filters would allows users to do personalized/adaptive search.



Users would find detailed information about the tutor and class within this screen and once they like it, they can book the class.



There are only two steps for users to book the class. They should determine when/where they want to have first meeting.

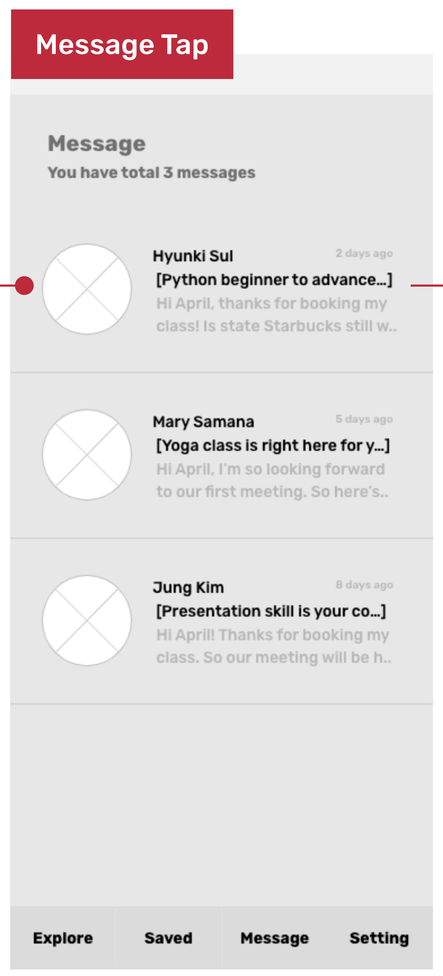


As for the last step, users double confirm with hourly basis tutoring fee and also can make optional comments for tutors.

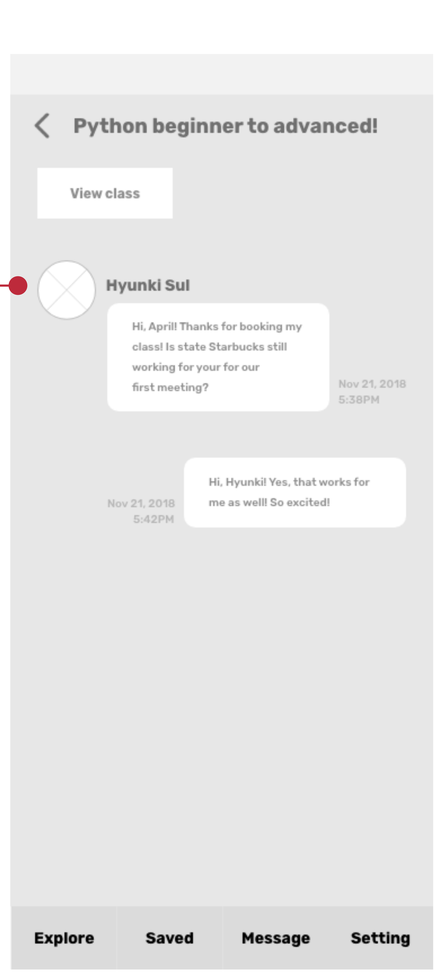
Saved Tap

Users can save classes, which they are interested in and see saved classes in the saved tap.

Message Tap

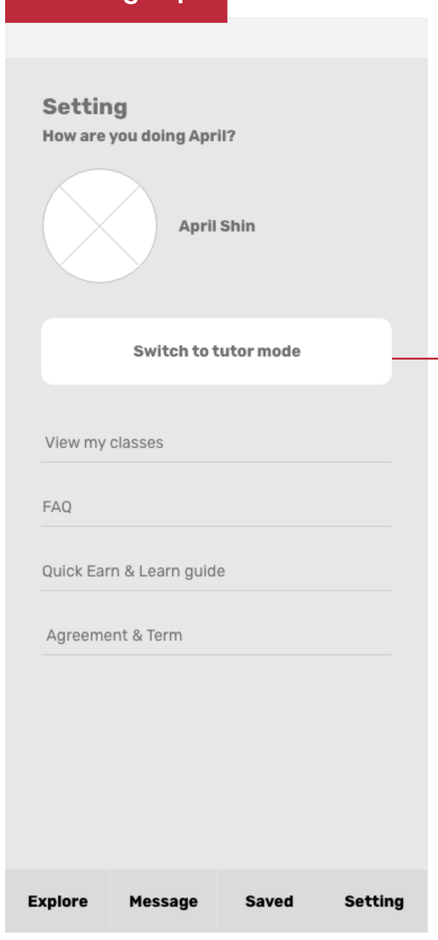


Message tap allows users to directly communicate with tutors and show the history of communication with tutors.



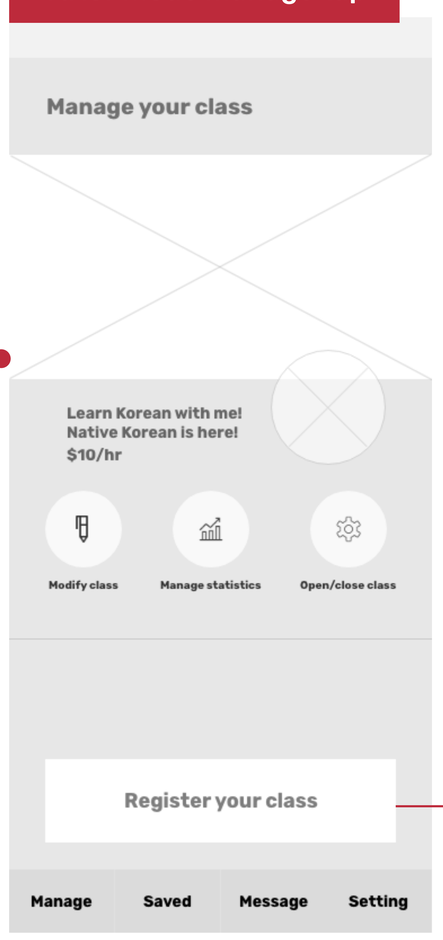
Users can review about the class and tutor within the message tap at once.

Setting Tap

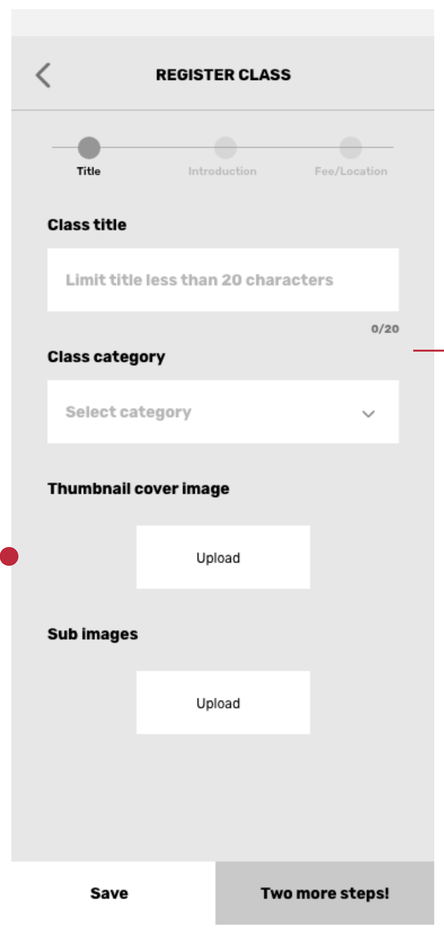


In setting, users can see classes they booked, FAQ, app guide, and agreement and terms. Importantly, they can switch their account to tutor mode.

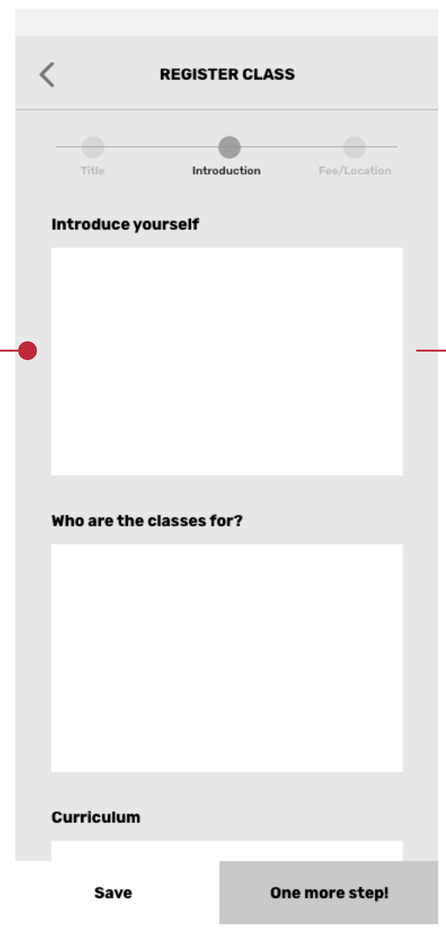
Tutor mode manage tap



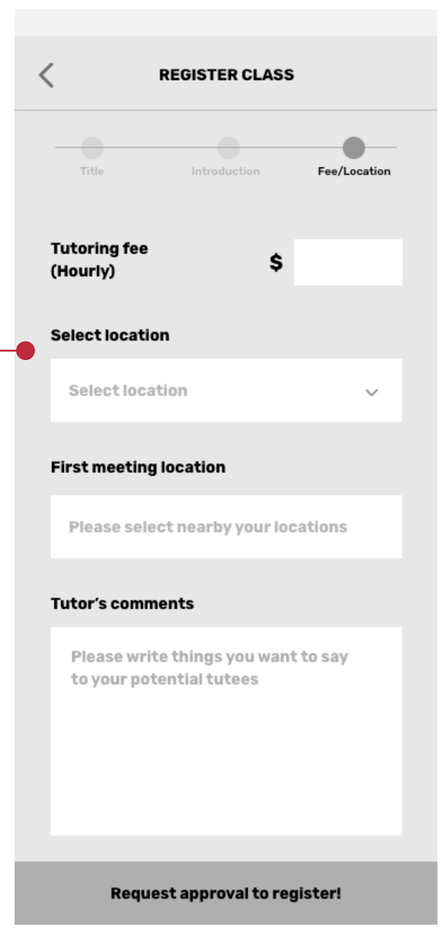
Once users switch to tutor mode, they can easily manage their classes. They can always register classes quickly and easily by tapping register button.



To register classes, users only need three steps to fill in. Firstly, put class title, category, and images.



Secondly, as a tutor, users introduce themselves (tutor verification upload is required) and put detailed information about their tutoring sessions.



Finally, tutors put their tutoring fee, location, and comments.
